

# LOGBOOK AUDITING & MONITORING

Logbook auditing and monitoring is at the heart of regulatory compliance for Carriers. ABS SafeCom has been helping transportation companies with regulatory compliance since 2002. We specialize in providing all our clients with customized compliance solutions that fit their needs.

 More than one-third of all violations with MTO & DOT revolves around Hours of Service and Driver Logs!

## WHY

According to MTO & DOT, an Operator shall monitor each driver's compliance with Hours of Service (HOS)- Ontario Regulation (555/06) & DOT's FMCSA Part-395.

### Critical for Compliance & Avoiding Costly Fines

Log Book Auditing & Monitoring is often a challenge for fleets. Staying on top of the task of monitoring drivers' Hours of Service and conducting accurate, complete driver log auditing are critical for compliance and avoiding costly fines.

### Expertise is Required

Some organizations do not have the resources or in-house expertise to get the job done adequately. Others prefer to contract out driver logbook administration. Simplifying your log auditing process impacts compliance.

### Benefits of a Well-Functioning Log Auditing System

Below are some tips from our Log Auditing Experts that can help you understand why logbook auditing is critical:

- As a Carrier, it is your responsibility to audit and monitor your drivers' logs.
- If you do not audit, then do not expect compliance.
- If you cannot read the log, it is a violation.
- If auditing has turned up a problem, deal with it quickly.
- Speed counts in auditing. If you are three months behind in auditing and a driver is making a mistake, you will have three months of mistakes to deal with!

## HOW

### ABS SafeCom's DRIVER LOGBOOK AUDITING SERVICE takes this burden off your hands!

We will assist with the development of a system to accomplish your regulatory compliance goals.

- Just send us your logs, and we will organize them, perform a complete audit, and provide timely, relevant reporting.
- Our Log Auditing Experts are ready to assist you with simplifying your log auditing process.
- We cross check Driver Logs with Fuel Statements and Border Crossing Records.

**Our LOGBOOK Auditing & Monitoring Service** helps you quickly to get into compliance with MTO & DOT Requirements. We consider your goals, budget and time involvement. We audit the logs and provide monthly reports including:

- Compliance Notification
- Monthly Utilization
- Violation Summary
- Violation History
- Missing Logs
- Falsified Logs
- Fuel Statement Reconciliation
- Border Crossing Reconciliation

### Key Benefits

- Improved compliance with Hours-of-Service regulations.
- Reduced CSA Driver Fatigue violations.
- Compliance reporting that helps you make sound business decisions.
- Reduced costs associated with labor, fines and litigation.
- Consistent processes across your organization.
- Centralized driver database.
- MTO or DOT audit support and access to Our Experts at your request.
